## Precision Running Bond

Its an LED wall alternative. A computer controlled cutting system capable of extremely exact specifications combined with a running bond pattern ensures premium quality.

## Simple Installation

Each panel is designed with an attachment system that utilizes neodymium magnets to securely “snap” panels into place.

### Frame

- Aluminum structure with hard panel attachment assembled on-site
- The outer frame has a 1” bezel

### Aspect Ratios

16:9 | 16:10

### Size

Max: 330” (8382mm) in 16:9

### Installation | Adjustment

- Frame is assembled on-site
- Panels (“tiles”) are rigid and attached onsite in a running-bond pattern and will be either 3x3, 4x4, 5x5 or 6x6 configurations

### Material

Black Diamond 1.4
