INTRODUCTION - Kratos

Kratos is an 8 Shade/ Screen Power Hub that allows connection to any 24v Zigbee / RTS Low-voltage motor.

Features

- Power for up to eight Zigbee/RTS LV shades/screens
- Eight 2 - position Terminal blocks
- Ports protected against mis-wiring
- Versatile mounting options
- Completely solid state, no moving parts
- Unit stays at room temperature (does not get hot)
- Din Rail mounting capability
- Rack mounting capability

INITIAL CONSIDERATIONS

Thank you for your purchase of Kratos.

This is designed to be installed indoors, Rack or Din mounted. Kratos has eight 2 - position power ports and 1 DC Power input.

For example:

With 32 shades, and 4 Kratos units.

PARTS IN THE BOX

Kratos

Universal DIN Rail Bracket (2)

Universal Rack Ears (2)

Rack Mount Fascia

250W Power supply (1)

AC Power Cable (1)

Long Rack Ear

1.5 mm Hex Tool

Rack Mount
Screws (4)

DIN Rail Screws (2)

Universal DIN Rail

4 position terminal
blocks (4)

Universal Mounting
Screws (10)

INSTALLATION - CONNECTIONS

Connecting Power

Kratos uses 28v DC Power supply for Power. Kratos has four 4 - position Terminal Blocks to connect to Low-voltage shade(s) and screen(s).

INSTALLATION - CONNECTIONS

Connecting Kratos

Kratos offers the ability to connect up to four 4 - position Terminal Blocks to connect to Low-voltage shade(s) and screen(s). 2 Conductor Cable for each Zigbee/RTS LV motor.

Example: 4 shades connected in the drawing below.

RACK MOUNTING

Screw Hole Locations

Kratos can be mounted in various ways using these 10 screw hole locations.

Kratos, Janus, TRO.Y all share the same mounting features and accessories. There are infinite ways to install them together or separately.

RACK MOUNTING

Using Universal Rack Ear

The symmetrical hole pattern of the Kratos Universal Rack Ear allows these multi-functional Brackets to be mounted on either side of Kratos in any orientation. This makes it possible to mount Kratos to virtually any surface in multiple positions.

RACK MOUNTING

1. Half Rack

Kratos can be mounted in a standard half rack using 2 Universal Rack Ears.

Note: Half Rack hole spacing must be 9.73"(247mm)

2a. Full Rack (Single Kratos Unit)

A single Kratos unit can be mounted in a standard 19" rack using one Universal Rack Ear and one Long Rack Ear.

2b. Mounting with Kratos Full Rack

Two Kratos units can be coupled together and mounted in a standard 19" rack. Follow the steps on the following spread for installation.

- Using two (2) of the included DIN Rail Screws, install the DIN Rail onto the first Kratos unit.
- Using three (3) Rack Ear Screws each (included), install the two DIN Rail Brackets on the opposite side of the second Kratos unit.
- While holding both Kratos units, slide the DIN Rail through both DIN rail Brackets. Then, tighten both set screws using the provided 1.5mm hex tool.
- Slide the Rack Mount Fascia over the exposed DIN Rail bracket on the desired front face of the combined unit. Fasten the fascia down with two Rack Ear Screws (on the top and bottom).
- Finally, fasten one Rack Ear to each Kratos unit using three (3) Rack Ear Screws each.

DIN RAIL MOUNTING

Screw Hole Locations

Kratos is available in both plenum and non-plenum options. If mounting in a plenum air space, ensure you have purchased one of the plenum rated Kratos kits.

Kratos can be mounted in various ways using 10 screw hole locations.

DIN RAIL MOUNTING

Using Universal DIN Rail Bracket

Similar to the Universal Rack Ear, the Kratos Universal DIN Rail Bracket features a symmetrical hole pattern which provides 10 total mounting locations on Kratos. Each Universal DIN Rail Bracket has multiple threaded holes which accommodate set screws to lock the Brackets in place along the DIN Rail.

DIN RAIL MOUNTING

Using the Universal DIN Rail Brackets Kratos can be mounted in a variety of orientations and locations. The Universal DIN Rail Brackets are designed for TS-35 'Top Hat' DIN Mounting Rail and can be mounted on the bottom or either side of Kratos.

STRUCTURED WIRING BOX MOUNTING

Kratos can be installed into nearly any structured wiring enclosure using either the Universal Rack Ears or Universal DIN Rail Brackets. Structured wiring enclosures are a convenient and professional way to manage wiring and mount supporting devices such as power supplies. You can use one of the Jopplin Kits to have a complete mounting solution for the enclosure.

Parts in the Jopplin XVI Bracket Kit

90 Degree Power
Connectors (2)

Kratos Stack
Mount Brackets
and shovels(2)

Power Supply
Upper Bracket

Power Supply
Lower Bracket

Depending on which Jopplin Kit is selected:

1. Connect up to 2/4 Kratos units into the Stack Mount Brackets and shovels.
2. Assemble top and bottom Power Supply Brackets and insert up to 2/4 Power Supplies.
3. Route Power Supply cables from 2/4 Power Supplies up to the 2/4 Kratos units installed into the Stack Mount.

TROUBLESHOOTING

Tech Support: 512.832.6939

Problem	Possible Cause	Action to Take
Kratos won't operate.	Kratos is not powered.	1. Check AC Cable connection on your power supply. 2. Make sure power supply switch is turned on.
Low-voltage shade does not respond to controls.	The conductor cable may not be connected correctly.	1. Ensure that the Terminal block (+) and (-) line up to the of the (+) and (-) of the Kratos unit (each of the 4 power port sections contains 2 shade outputs each, refer to pg. 6).
