OPERATING AND CARE OF YOUR SCREEN

- Operation of the screen systems should only be performed by responsible parties.
- Always check the path of the Solo 3 screen before operating to ensure that the path is clear of
 furniture or obstacles that could prevent full operation. Monitor the Solo 3 screen for smooth
 operation through its entire range. Operating a Solo 3 screen unattended may lead to damage from
 obstructions or other causes.
- Fabric maintenance and cleaning—Solo 3 screen fabric is subject to debris under normal use or
 in storage, requiring occasional maintenance and cleaning. While fading and wear over time are
 normal, debris could accelerate this wear. Screen fabrics can be cleaned with water and a mild soap.
 Scrubbing with a bristle brush or pad is not recommended.

BEFORE PROCEEDING

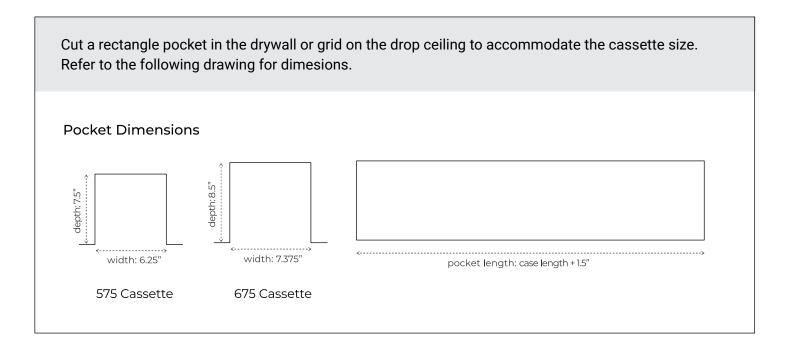

For best results, read the instructions in their entirety before proceeding with assembly. Actions contrary to the instructions invalidate the warranty and may result in serious damage and/or injury.

Preparing for Installation:

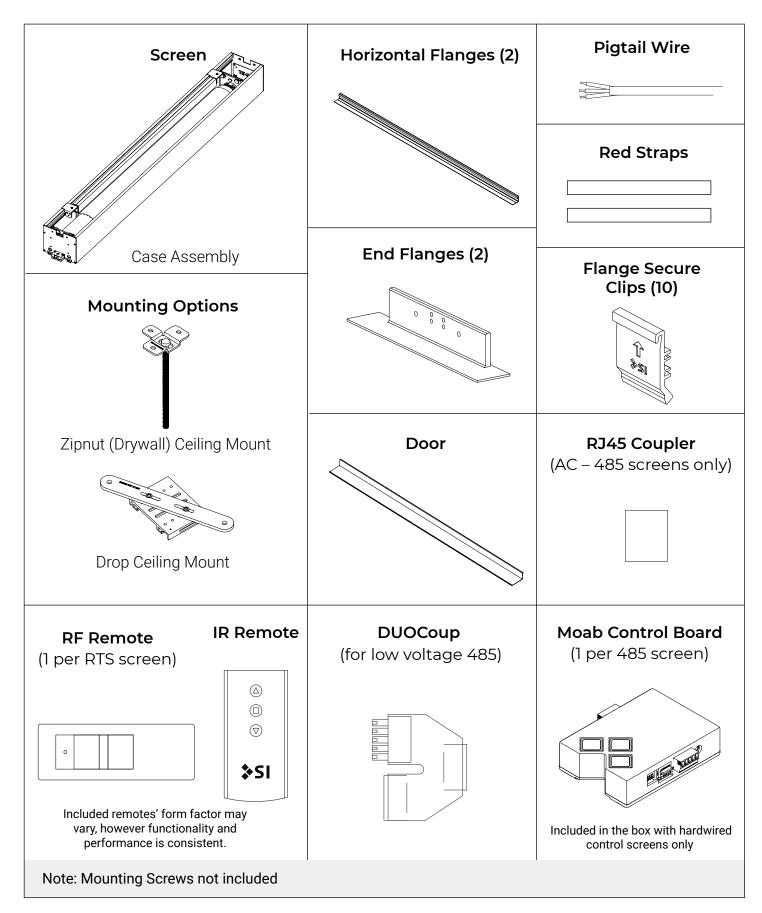

It is crucial that all installations are planned out carefully before specifying a screen order and assembly. Before installation, Bracket/Mounting method and Assembly Installation method must be identified.

- Do not use a knife to cut foam or wrapping, as this may damage the shade including, but not limited to, the casette, fabric tube, and material roll.
- The tube may shift within the cassette during shipping; open the cassette with care.
- Unpacking the box lay cassette, fabric tube, and material roll on a soft, clean surface during the
 installation process. When removing from the box, ensure the assembly is kept horizontal to prevent
 damage.
- Screen Innovations recommends METHOD 2 (removal of the material roll before installation) when
 installing the Solo 3 screen for better control and safety of the material inside. When removing
 material from the cassette, use at least two people to lay material down on a clean, flat surface, such
 as a blanket or sheet.
- When utilizing either method, especially METHOD 1, make certain there are enough installers/
 hoisting equipment to safely lift the cassette (and/or material) onto the brackets. Brackets must be
 level and in-line with one another before attempting to lift cassette onto brackets. Use safe lifting and
 rigging techniques.

CONSIDERATIONS

PARTS IN THE BOX - SOLO 3 INDOOR 575/675 - FLUSH

INSTALLATION METHODS

BRACKET INSTALLATION METHODS

When installing brackets and mounting the cassette/assembly, make sure to follow the complimentary instructions once readying the cassette for mounting. For example, the Bracket Method 1 – Drywall Mount instructions accompany the Mounting Method 1 – Drywall Mount instructions. Ensure matching instructions are followed.

- (1) Method 1 Drywall Mount page 6
- (2) Method 2 Drop Ceiling Mount page 7

ASSEMBLY INSTALLATION METHODS

Before installation, determine your installation method according to your product order and installation preferences. The Solo 3 Indoor 575/675 Flush may be installed with or without the material/fabric tube. Method 1 details the removal and reinsertion of the material roll as well as installation of the cassette, while Method 2 outlines installation of the assembled unit. When using Method 2, ensure use of the accompanying Method 2: Material Only installation instructions.

SI recommends Method 2- removing the material tube- if the screen is larger than 130."

- (1) Method 1 Assembled page 9
- (2) Method 2 Disassembled (Cassette ONLY) page 9

MOUNTING METHODS

The Solo 3 Indoor 575/675 Flush may be mounted in drywall or drop ceiling.

- 1 Method 1 Drywall Mount page 13
- (2) Method 2 Drop Ceiling Mount page 14

BRACKET INSTALLATION

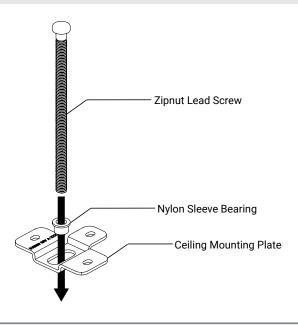

- · Method 1 Drywall Mount page 6
- Method 2 Drop Ceiling Mount page 7

BRACKET INSTALLATION - METHOD 1 - DRYWALL

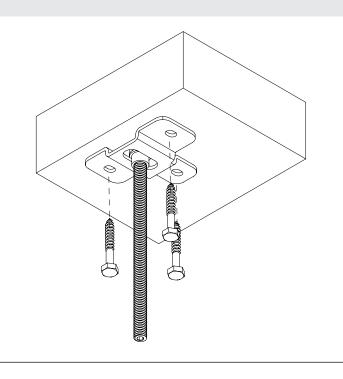

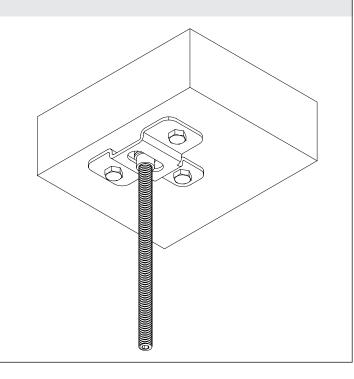

Put the zipnuts together as shown below, then place back inside the cassette on both sides.

NOTE: Each cassette includes the zipnuts preinstalled.

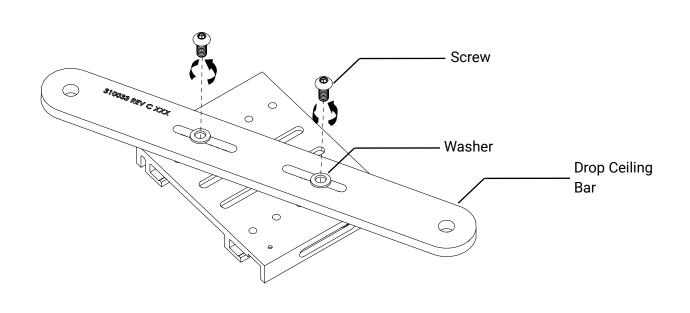

Install brackets centre blocking at the end caps. Secure blocking by screwing in place. With lag bolts, screw the sheet metal brackets into the blocking with lead screws installed.

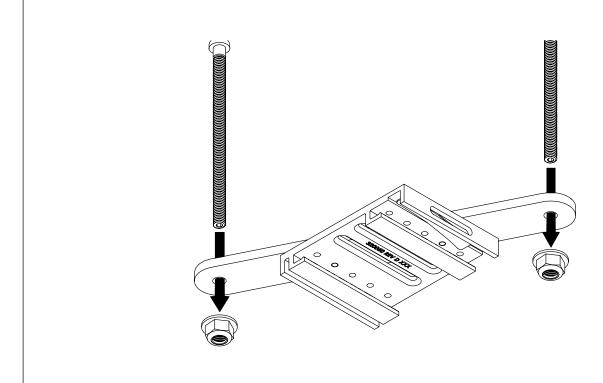

BRACKET INSTALLATION - METHOD 2 - DROP CEILING

- 1 All thread through the ceiling using two rods on each side of the cassette.
- Use the swivel bar to mount the cassette at an angle as needed. Place the plastic sleeves on the bolt to mount, then insert the all thread rods through the swivel bar and secure with nuts.

ASSEMBLY INSTALLATION

Before installation, determine your installation method according to your product order and installation preferences. The Solo 3 Indoor 575/675 Flush may be installed with or without the material/fabric tube. Method 1 installation consists of mounting of the assembled unit, while Method 2 details the removal and reinsertion of the material roll as well as installation of the cassette. When using Method 2, ensure use of the accompanying Method 2: Material Only installation instructions.

SI recommends Method 2— removing the material tube— for screens larger than 130."

- Method 1 Assembled page 9
- · Method 2 Disassembled (Cassette ONLY) page 9

ASSEMBLY INSTALLATION - METHOD 1 - ASSEMBLED

NOTE: This method outlines installation of the cassette with the material tube preinstalled inside.

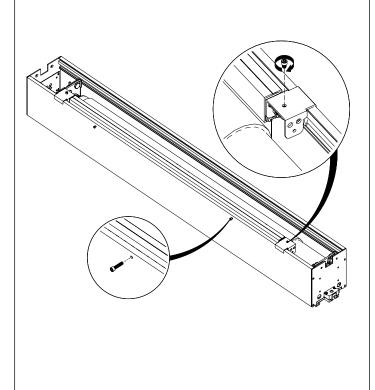

To remove the material tube, see page 11.

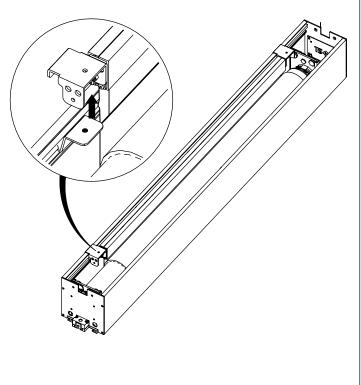

To complete installation, see page 23 for installing final touches.

ASSEMBLY INSTALLATION – METHOD 2 – DISASSEMBLED (CASSETTE ONLY)

NOTE: This method outlines installation of the cassette without the material tube preinstalled inside. After completing installation of the material roll, see page 23 for installing final touches.

- Unscrew the screws from the weight bar clip (red).
- Remove attached screws from the bracket. Set the screws aside. Remove clips where attached to the cassette.

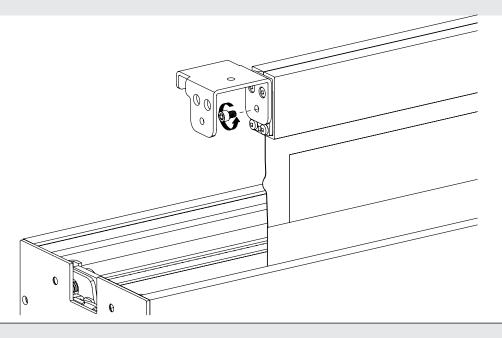

ASSEMBLY INSTALLATION - METHOD 2 - DISASSEMBLED

Unscrew the weight bar clip from the weight bar, taking care not to bend the material.

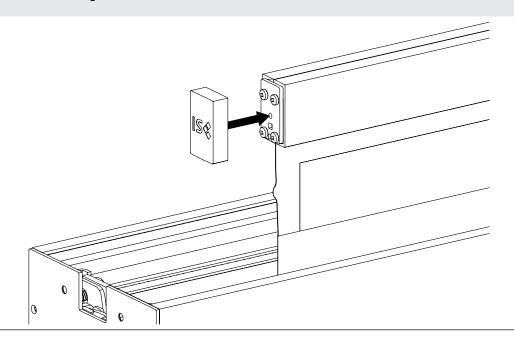

NOTE: It is recommended to remove the clip fully once the material roll is installed into the cassette after mounting.

Attach the magnetic endcap to the weight bar, keeping the material from bending.

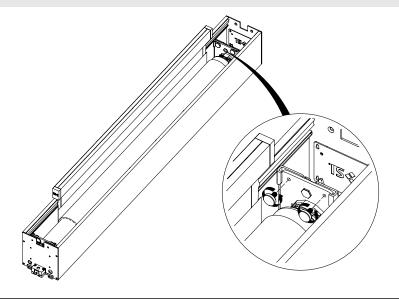

NOTE: It is recommended to wait to attached the end caps after the material roll is inserted into the cassette after mounting.

ASSEMBLY INSTALLATION - METHOD 2 - DISASSEMBLED

(5)

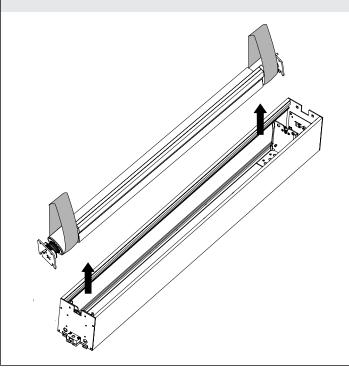

Undo the silver safety screws, then press the latch as shown.

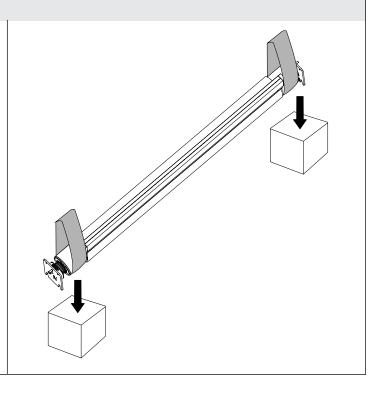

Using the red straps, loop the straps under the material roll, being careful to avoid the material and any obstructions. With the help of the straps on both ends, slowly pull out material roll and set it aside on a clean, soft surface.

To avoid scratching the screen material, use packaging foam to carefully pick up the material from the floor.

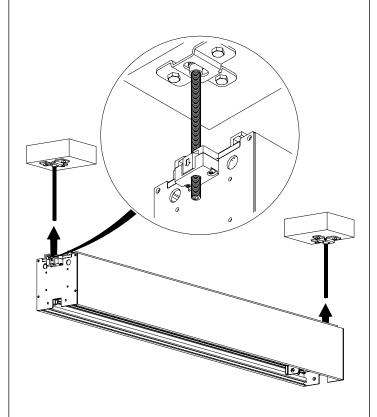

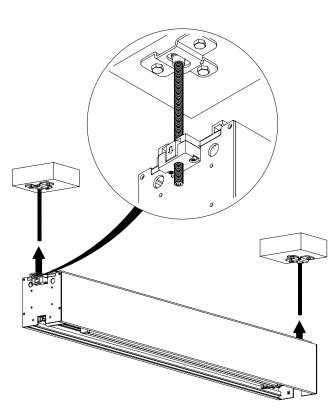

MOUNTING INSTALLATION

- Mounting Method 1 Drywall Mount page 13
- Mounting Method 2 Drop Ceiling Mount page 14
 - Weightbar Attachment page 16

MOUNTING - METHOD 1 - DRYWALL

The zip nut on each side of the cassette allows the $^{3}/_{8}$ x 16 all-thread rod to insert and lock like a zip tie; line the zipnut up with the lead screws and rachet upwards to zip halfway. Ensure the cassette is completely level.

Assembly Method 1: Assembled

To remove the weight bar clip, follow steps on page 16.

NOTE: To remove the material tube prior to installing the cassette for ease of installation, follow steps on *page 9-11* (Assembly Method 2).

Assembly Method 2: Disassembled

To reinstall material, skip to page 18.

In cases where the cassette is ordered ahead of the material roll, refer to the Method 2: Material Only instructions for installing the material roll.

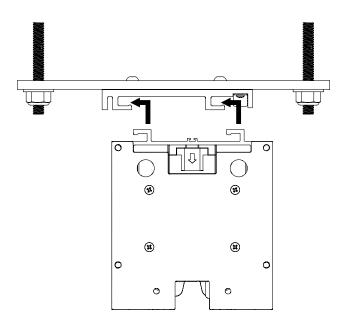

MOUNTING - METHOD 2 - DROP CEILING

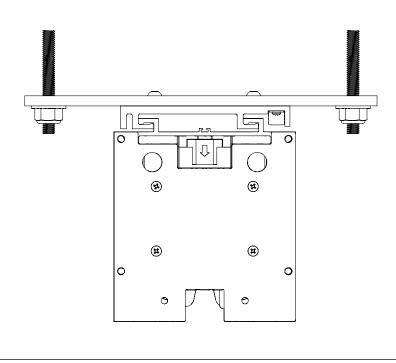

NOTE: This step accompanies Assembly Method 1: Assembled.

To remove the material tube (Assembly Method 2), follow steps on page 9-11.

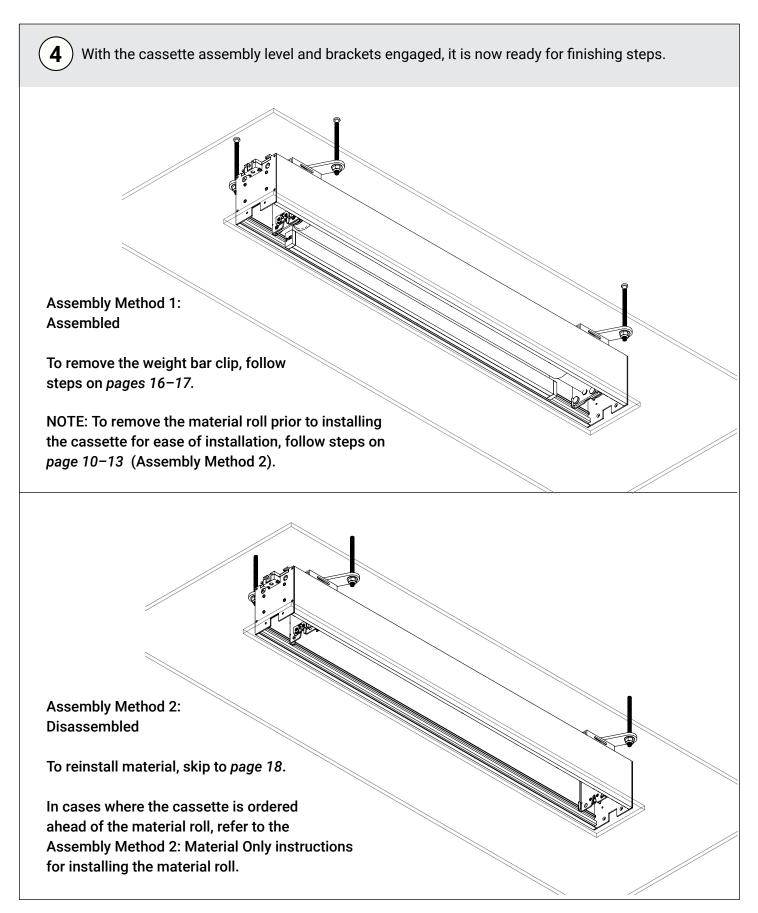

(1)

Lift the case straight up and hook onto the brackets attached to the swivel bar. Once the brackets engage, the cassette will "click" into place.

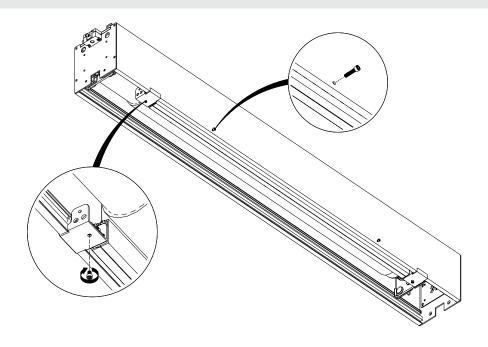

MOUNTING - METHOD 2 - DROP CEILING

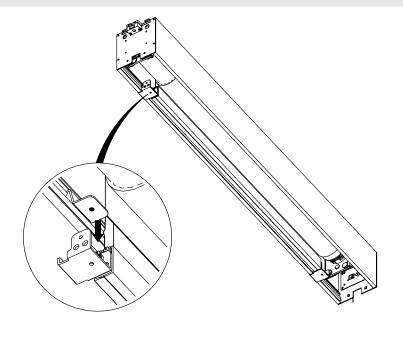

MOUNTING - METHOD 2 - WEIGHT BAR

NOTE: To reinstall the material tube into the cassette, skip to page 18.

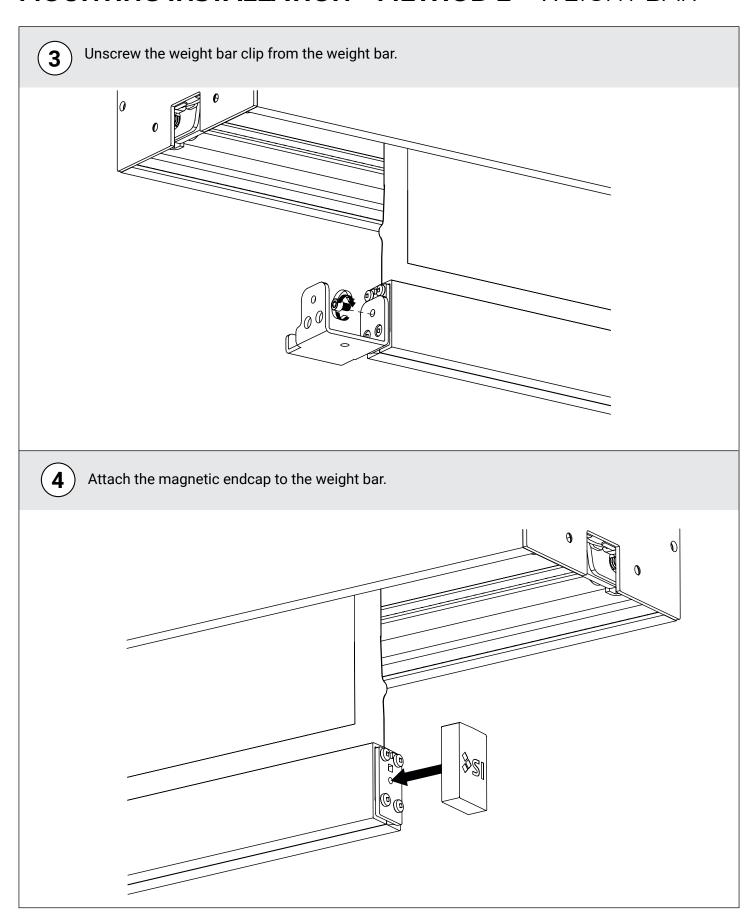

1 Unscrew the screws from the weight bar clip (red).

Remove attached screws from the bracket. Set the screws aside. Remove clips where attached to the cassette.

MOUNTING INSTALLATION - METHOD 2 - WEIGHT BAR

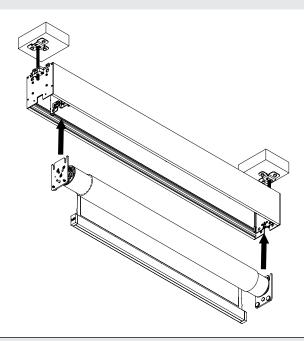

REINSTALLING MATERIAL TUBE (METHOD 2)

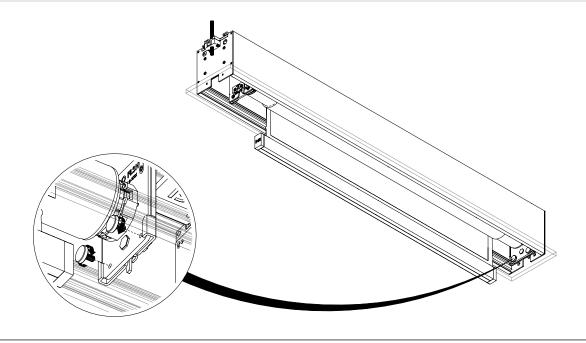

NOTE: Follow these steps for Assembly Method 2: Disassembled. If using Assembly Method 1, skip to page 23 for Finishing Touches.

(1)

Slide the material roll with mounting plates on each end into the cassette. Each end will "click" into place as the brackets engage.

2 Fasten the silver safety screws on the mounting plates to secure the material roll.

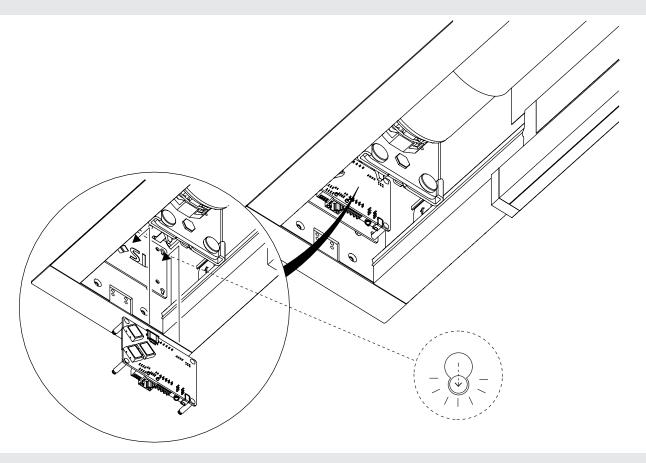

INSTALLING/ REMOVING MOAB - 485 SCREENS

Connect Moab included in your Accessory box

Note1: Before installing/removing Moab, ensure all power is disconnected.

Note2: **For internal moab installation**, remove the enclosure using the slot on the right side just above the Din Rail feature, with a large flathead screw driver, gently pry the bottom away from the top.

- The Moab board can be placed or removed from the internal PCB mounting plate by gently moving the entire board **up to remove** and **down to re-attach** the 4 standoffs. The reattachment will provide a tactical "click" feel and snap in place.
- 2 Depending on your motor configuration(110/220v or 24vDC), make the communication and power connections by following the steps on next 3 pages.

NOTE: If permanently removing/relocating Moab, refer to the *External Wiring* section of the Moab instructions by scanning this QR code.

INTERNAL CASSETTE WIRING

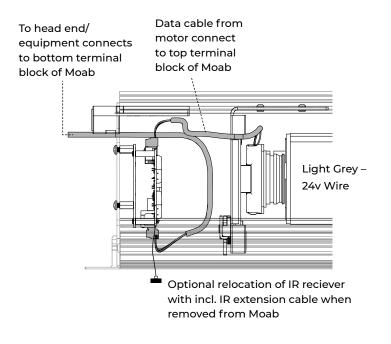

NOTE: All Bracket, Assembly, and Mounting methods include Wiring as a part of installation.

- · 24V DC
- · 110/220V AC

INTERNAL CASSETTE WIRING - 24V DC

NOTE: Determine the wiring type of your project; for 110/220v AC, refer to the following page.

1. Terminate the wires with the provided terminal block/ RJ45 as shown below.

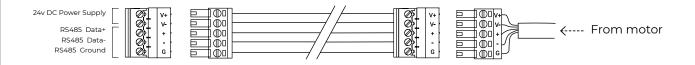

end/equipment

5 conductor wire to head

Detailed Low Voltage Power and 485 Control Wiring (DC Motor)

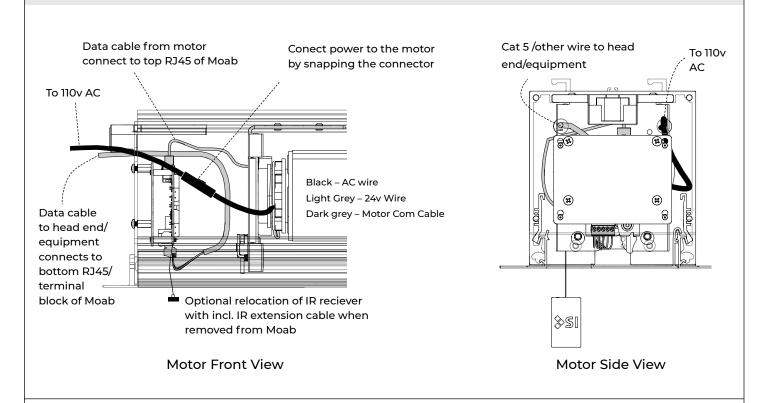

Scan this QR code to review your wiring to determine the maximum length of the wire on the three (3) options as shown, or use this link:

https://si-website-files.s3.amazonaws.com/Downloads/Programming+Guides/Shade/wire-topologies.pdf

INTERNAL CASSETTE WIRING - 110V/220V AC

- 1. Terminate the wires with the provided terminal block/ RJ45 as shown below.
- 2. Make sure an appropriate junction box or power receptacle is located within 5ft of the installation location.
- The installer must follow all local electrical codes when connecting 110v AC power. A certified electrician is required to connect pigtail power.

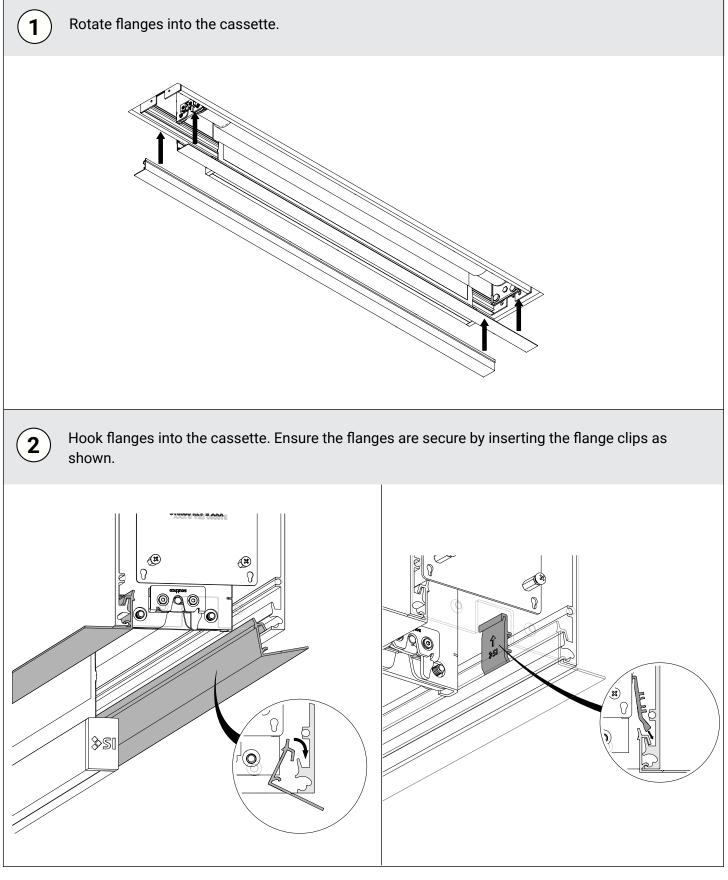

RJ45 Coupler (used only when Moab has been relocated to head end) RS48S (1) - White RS48S (1) - White

INSTALLATION - FINISHING TOUCHES

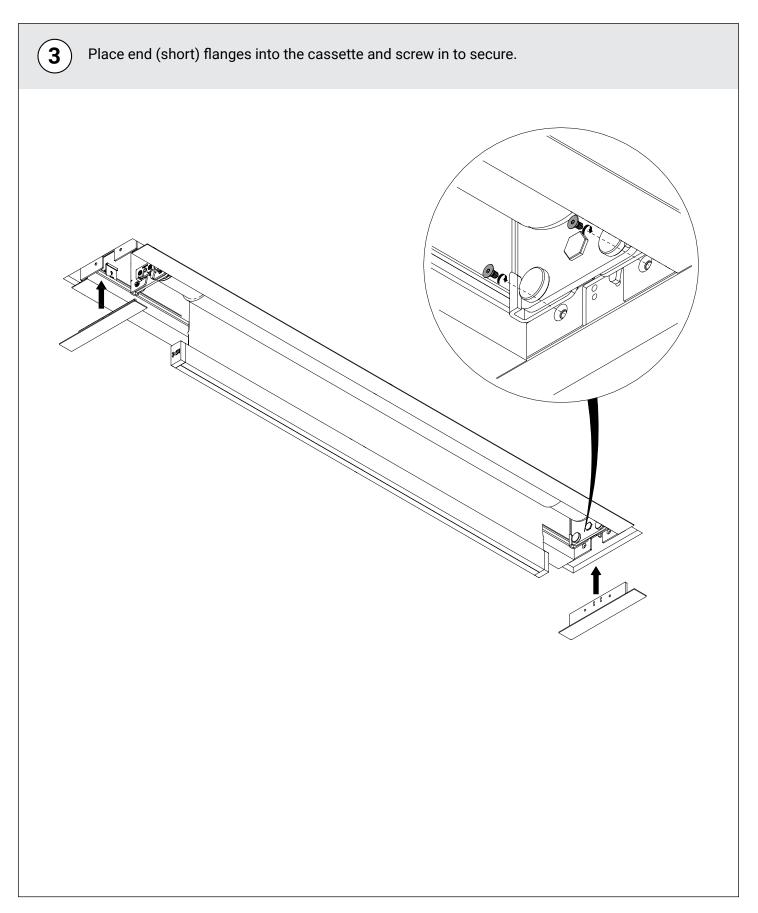

NOTE: All Bracket, Assembly, and Mounting methods include Finishing Touches to complete installation.

- Flanges
- · Fascia Door

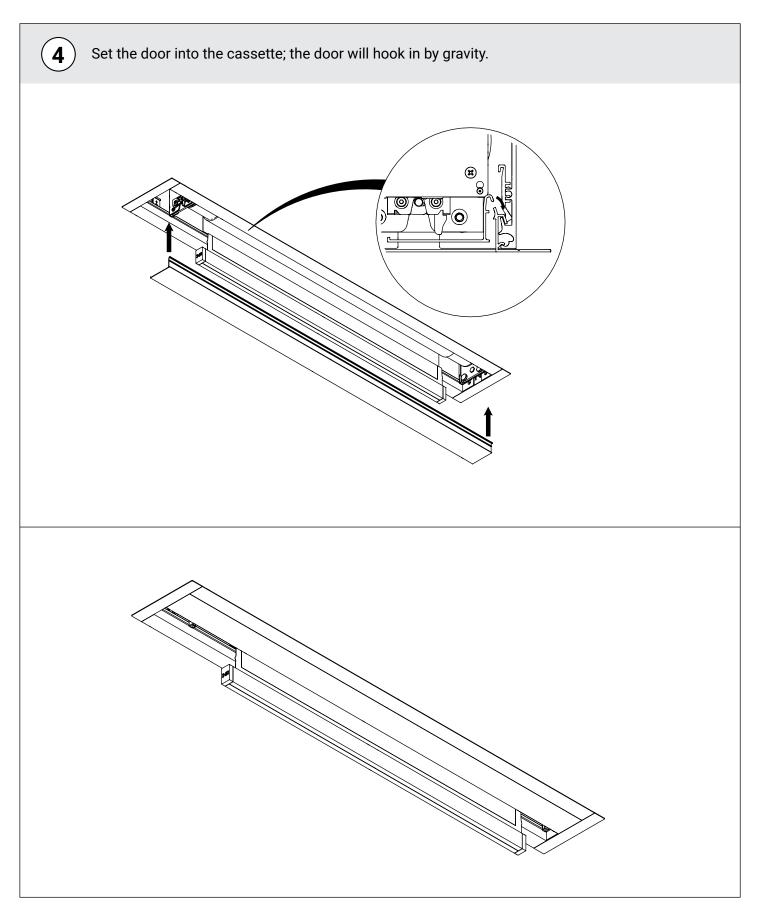

INSTALLATION - FINISHING TOUCHES - FLANGES

INSTALLATION - FINISHING TOUCHES - FLANGES
