# Dynamic-2S-XL

[DT-DYN-2S-XL]

On wall projector screen with 2-way motorised side masking for visible screen width greater than 540cm

The Dynamic-2S-XL supports 2-way motorised side masking allowing perfect framing of aspect ratios in the range 1.33 to 2.40:1. This variable width and constant height masking maximises the impact of movie content.

The Mask Position Logic (MPL) system is a proprietary development of DT Screens and enables the Dynamic-2S-XL to calculate the exact location that the masks should be positioned to create any requested aspect ratio in the supported range. With MPL, setting mask presets is no longer required.

## TECHNICAL SPECIFICATION:

- Overall size=

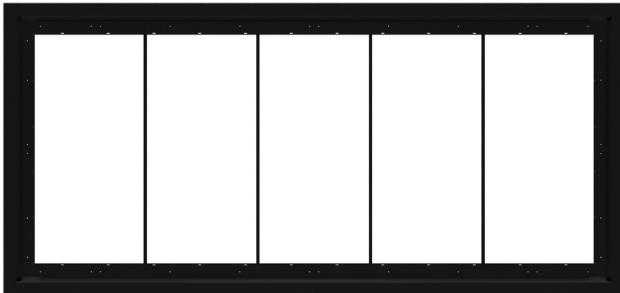

Width = Viewable Screen width + 600mm [23.6"]

Height = Viewable Screen height + 600mm [23.6"]

Max frame depth = 200mm [6"]

Wall Surface to image Surface = 96mm [3.78"]

- Available with our full range of Image Surfaces
