Dynamic-4-XL

[DT-DYN-4-XL]

On wall projector screen with 4-way motorised masking
for visible screen width greater than 540cm

The Dynamic-4-XL supports 4-way motorised masking allowing perfect framing of all aspect ratios in the range 1.33 to 2.40:1. This variable width and variable height masking maximises the impact of all types of content.

The Mask Position Logic (MPL) system is a proprietary development of DT Screens and enables the Dynamic-4-XL to calculate the exact location that the masks should be positioned to create any requested aspect ratio in the supported range. With MPL, setting mask presets is no longer required.

TECHNICAL SPECIFICATION:

- Overall size=

Width = Viewable Screen width + 600mm [23.6"]

Height = Viewable Screen height + 600mm [23.6"]

Max frame depth = 246mm [9.69"]

Wall Surface to image Surface = 96mm [3.78"]

- Available with our full range of Image Surfaces
